PROFILE

Frontend Developer with over hands on experience in designing and developing responsive and visually appealing web applications using React.js, HTML, JavaScript, and TailwindCSS. Proficient in building custom visualization dashboards and optimizing application performance through modern front-end technologies. Experienced in leading projects and collaborating with cross-functional teams to deliver high-quality solutions. Skilled in API integration

EDUCATION

Sir Padampat Singhanian University, B.Tech (CSE AIML),(7.0/10) 2021-25.

Senior Secondary, Sri Chaitanya College , Hyderabad, (86.40) 2020-21.

Secondary, Sri Sai Ram High School , Hyderabad, (75.30) 2018-19.

PROJECTS

1.I developed a Weather Application using HTML, CSS, and JavaScript, integrating the OpenWeatherMap API to fetch real-time weather data. The application features a responsive UI, ensuring a seamless experience across different devices. Additionally, I utilized JavaScript for API handling and dynamic content updates, enhancing the app's functionality and user experience

2. I built a Swiggy Clone using React.js, HTML, CSS, and JavaScript, integrating the Swiggy API to display real-time data such as food items, restaurants, and prices. The project includes features like search functionality, filtering options, and dynamic content updates for a better user experience. I focused on creating a responsive UI, ensuring optimal performance and usability across both mobile and desktop devices.

3. Pack Your Bags Udaipur Website: I built a tourism website to showcase skills and projects using HTML and CSS.

4. Portfolio Website: I designed and developed a personal portfolio website to showcase my academic and personal projects. The website highlights my skills in web development, including proficiency in HTML, CSS, JavaScript, and responsive design. It features detailed project descriptions, images, and code samples, allowing visitors to explore my work across various technologies and domains. The portfolio demonstrates my ability to build user-friendly, interactive web applications and reflects my commitment to continuous learning and improvement.

4. I developed a Wikipedia Search Application using HTML, CSS, and JavaScript, integrating the Wikipedia API to fetch and display search results dynamically. The application includes a search functionality that allows users to look up articles and view summaries. I designed a simple, user-friendly interface with a responsive layout for seamless usability across devices.

5.I developed a Bomb Game using JavaScript, leveraging setInterval and clearInterval for time-based mechanics. The game features a countdown timer, where players must defuse the bomb within a given time limit. I focused on creating interactive gameplay with dynamic event handling and time control, while designing a simple, intuitive interface to ensure an engaging user experience.

SKILLS

1.Programming Languages : HTML,CSS,JAVASCRIPT

2.FrameWorks & Libraries : Reactjs,Tailwindcss, Nodejs, Expressjs

3.Technologies & Tools: AWS, GIT, Postman, GitHub, Gitlab, New Relic, Git, NPM.

4.Microsoft Office 365 (Power point,Word,Excel)

STRENGTHS

1.Problem Solving

2.Hardworking

3.Public Speaking

4.Creative Skills

5.Quick learning
